

Another historical day for the Southwest District Mission Program, Inc. is fast approaching. June 26th a shipment of Water Purification Systems (WPS) and a one-year supply of extra replacement filters and ultra-violet lights will be flown from Venice, Florida to Havana, Cuba.

On this shipment we have WPS going into nine districts in Cuba:

Ciego de Avila

Cienfuegos

Havana

Holguin

Holguin Norte

Las Tunas

Pinar de Rio

Sierra Maestra

Villa Carla

We have one church in Florida that believed so much in this project they have purchased ten systems. I also thank each church and each individual that have donated funds to purchase a system. Also now for the first time we will have a supply of filters and ultra-violet lights in Cuba.

The easy part is done; many challenges are still in front of us. Agape Flights from Venice, Florida will again be delivering this shipment. We ask for your prayers for a safe flight, customs mercies and government blessings.

God has blessed us in many ways. When we hear the stories being told by parents about what it means to have clean pure water for their children, plus all the children in the village, this is priceless to hear.

What hurts is the conversation with the father who tells me his son has parasites because of drinking contaminated water. It does not have to be that way!

God bless, thank you for all you do, but pray....

In Christ,

Dan Christopherson
